G. B. HARRISON WINS SUIT AGAINST MORRISON FULLER.

Jury Awards \$10,000 Damages—
Defendant, Though Not an Attorney,
Conducts His Own Case.

St. Louis, Mo., Sept. 26.—Four thousand
dollars damages were awarded to George
B. Harrison by the jury here today in the
case of Harrison vs. Morrison Fuller. The
plaintiff, though not an attorney, conducted
his own case. He had been sued for
damages by Morrison Fuller, who had
been injured by a car driven by Harrison.
The jury found in favor of Harrison and
awarded him \$10,000 in damages.

Harrison is president of the Missouri
Bank and Fuller is president of the
Missouri Central National Bank.

The suit was for damages for the
injury to Harrison's car by Fuller's car.
The jury found in favor of Harrison and
awarded him \$10,000 in damages.

THIS SOCIETY BARS LAWYERS.

Protective Association Applies in
Court for Pro Forma Degree.

The Commercial Society, No. 1, of
St. Louis, Mo., has applied to the court
for a pro forma degree of incorporation.
The society is a protective association
and has applied for a pro forma degree
of incorporation. The court has granted
the application and the society is now

ANGIOLA WINS IN SIXTH HEAT

Ohio Stake for 2:09 Class Trotters
Captured by Horse Which Runs
Eighth, Fourth and Eighth in
First Three Trials.

Cincinnati, Sept. 26.—The Ohio stake for
2:09 class trotters, purse \$10,000, was the
feature event of the Grand Circuit races
at Oakley Park here today. It took six
heats to decide the race.

Angiola, after finishing eighth in the
first heat, fourth in the second and eighth
in the third, won the fourth heat easily
by a wide margin, and was instantly
killed. Her driver, J. Miller, was only
slightly injured.

Byrd Wilkes had no trouble in winning
the 2:10 pace in straight heats.

In the first heat, Wilkes ran into the
force at the last eighth pole after
bursting a blood vessel, and was instantly
killed. His driver, J. Miller, was only
slightly injured.

Byrd Wilkes had no trouble in winning
the 2:10 pace in straight heats.

FEVER GERM THEORY HANGS ON MOSQUITO

New Orleans Physician Says Cell
Found in Patient's Blood Must
Also Be Discovered in Body of
Stegomyia Before Theory Is
Clearly Proven.

**FIVE DEATHS AND 31
CASES AT NEW ORLEANS.**

New Orleans, Sept. 26.—New cases
of yellow fever today were 5.
Deaths, 5.
Total to date, 31.
Under treatment, 28.
Cases discharged, 23.

New Orleans, Sept. 26.—More interest
centres here today on whether the
yellow fever germ is to be discovered as
the result of investigation that are in
progress here.

Dr. Potter in his report says a cell
found in the blood of a patient who
died of yellow fever must also be
found in the body of the mosquito.

In thirty-five separate cases these cells
have only once been found after the third
day of the fever, and then only in the
blood.

It is admitted that the stegomyia only
becomes infected if she bites the patient
within the first three days of the fever.

Dr. Potter makes no claim that his
investigation has established the germ,
but he says that if this same cell is found
in the body of the mosquito during the
fever, it will be a strong argument in
favor of the theory.

Though the deaths were more numerous
today, the fever situation today is
regarded as improving.

IMPROVEMENT AT PANAMA.
Panama, Fla., Sept. 26.—The yellow
fever situation here today shows
improvement. During the two previous
days, 10 cases were reported, and
today only 5 cases were reported.

Dr. Potter in his report says a cell
found in the blood of a patient who
died of yellow fever must also be
found in the body of the mosquito.

In thirty-five separate cases these cells
have only once been found after the third
day of the fever, and then only in the
blood.

It is admitted that the stegomyia only
becomes infected if she bites the patient
within the first three days of the fever.

Dr. Potter makes no claim that his
investigation has established the germ,
but he says that if this same cell is found
in the body of the mosquito during the
fever, it will be a strong argument in
favor of the theory.

Though the deaths were more numerous
today, the fever situation today is
regarded as improving.

QUARANTINE IS DOUBLED.
Montgomery, Ala., Sept. 26.—The State
today doubled its quarantine force
against yellow fever.

Dr. Potter in his report says a cell
found in the blood of a patient who
died of yellow fever must also be
found in the body of the mosquito.

In thirty-five separate cases these cells
have only once been found after the third
day of the fever, and then only in the

**CONDITIONS IN GENERAL
ARE FAVORABLE TO CORN.**

Limited Parts of Missouri Valley, Notably
Kansas and Missouri, Experience
Loss by Moisture.

Washington, Sept. 26.—The Weather
Bureau today issued a bulletin
regarding the corn crop in the
Missouri Valley.

The temperature during the week ending
September 24, was generally favorable
to the corn crop.

Dr. Potter in his report says a cell
found in the blood of a patient who
died of yellow fever must also be
found in the body of the mosquito.

In thirty-five separate cases these cells
have only once been found after the third

**ILLINOIS CORN CROP
NEARLY OUT OF DANGER.**

REPUBLICAN SPECIAL.
St. Louis, Sept. 26.—The weekly
crop bulletin was issued today by
Loren J. George, acting director of the Illinois
Bureau of Agriculture.

The weather, with clear skies and tempera-
tures in the 70s and 80s, was generally
favorable to the corn crop.

Dr. Potter in his report says a cell
found in the blood of a patient who
died of yellow fever must also be
found in the body of the mosquito.

In thirty-five separate cases these cells
